Training on Making Education Accessible for Students with Blindness & Print Disabilities

A Course offered under 'Prashikshan': A Joint Training Programme of CDRT, Kirori Mal College & Saksham under Aarohan Project

Welcome to the Training Course on Making Education Accessible for Students with Blindness & Print Disabilities!

Eligibility and Pre-requisites:

Before embarking on this exciting journey of accessible content creation, it's essential to ensure you meet the necessary requirements:

1. **Basic Knowledge of Computers**: Familiarity with Microsoft Word and email operations is mandatory for this course.

2. **MS Office Skills**: A strong understanding of MS Word, including creating tables, lists, and formatting, will greatly enhance your learning experience.

3. **Knowledge of Email and Google Drive**: Proficiency in accessing emails, using Google Drive for file management, and uploading and downloading files is highly beneficial.

4. **Scanning and OCR (Optical Character Recognition)**: While not mandatory, having knowledge of scanning and OCR processes is preferred.

Course Duration: Over a span of 9 weeks

Course Objectives:

Our primary goal is to empower you to create digital documents that are accessible to all readers, including those with low vision, blindness, or print disabilities. We aim to teach you how to make documents born accessible, eliminating the need for additional resources and effort for various reader groups.

Course Audience:

This course is exclusively designed for:

- **Students without Print Disabilities**: Enhance your digital document creation skills.

- **Teachers**: Learn to create accessible content for your students.

- **Volunteers**: Contribute to the accessibility of digital content.

- **Other Interested Members**: Gain expertise in this area and promote inclusivity in digital communication.

Course Outcomes:

Upon completion of this course, you will:

1. Create accessible Word documents.

2. Produce accessible PDF documents.

3. Generate accessible EPUB documents.

4. Learn to convert image files into readable text instantly.

5. Understand essential guidelines for ensuring the accessibility of all digital documents.

6. Utilize smartphones for instant accessible document creation.

Join us on a journey to make the digital world more inclusive and accessible to all. Let's create content that can be enjoyed by everyone, regardless of their reading preferences or abilities.
